

PRODUCTION-CLASS DOZER WALKWAYS & HANDRAILS

Brandt Hard To The Core walkway and handrail packages have been engineered—with extensive operator input—to meet the unique needs of your equipment, delivering unmatched fit and performance and longer operational life. Our robust mounting system has been engineered for enhanced durability under harsh conditions and less of the costly downtime associated with repairs. An extra-wide work platform provides ample space for safe machine mobility and maintenance without sacrificing visibility of the work area.

Brandt Hard To The Core attachments have earned their reputation as the toughest on earth; built to succeed in the most challenging conditions and optimized for your equipment.

Features:

- Brandt's rear platform kit delivers industry-best sight lines.
- The extra-wide walkway system delivers safety and ease-of-movement for personnel while working around the rear of the machine.
- Parallel walkway bars are used on the rear center section of the walks to ensure uninterrupted visibility of the ripper.
- Walkways come with a safety tread pattern on the walking surface and a heavy serrated lip to provide excellent traction in all conditions.
- This system has been custom-designed by our engineering team to withstand the relentless vibrations that production-class crawler dozers face on a day-to-day basis.
- All mounting locations and main connections are equipped with braided cable to absorb vibrations and safeguard structural integrity.
- Additional heavy-duty rubber isolator mounts connect the main segments of the handrail to provide a solid, vibration-damping hold.
