# Wheel Loader Front Plow

## Snow-Clearing in the Fast Lane.

The all-new wheel loader snow plow from Brandt allows you to clear more snow with uncompromising speed so you can get more production from your loader this winter.

### ① Productivity

Our innovative design enables you to quickly and consistently clear more snow:

- Spring-trip cutting edge minimizes snow loss while protecting the attachment and wheel loader when plowing at higher speeds.
- Four-inch cylinders come standard, increasing angling power to easily clear packed snow and ice.
- Conical blade profile delivers superior snow-casting ability to move snow as far off the roadway as possible.

### ② Reliability

This rugged plow is purpose-built to push through the toughest conditions:

- All pivot areas are made of high-strength abrasion-resistant steel for increased durability and longevity.
- Relief valve protects the hydraulic system from pressure spikes caused by obstructions.
- Internal ribs and external gussets provide the extra strength required to maximize attachment life, even in tough conditions.

### ③ Safety

This unit maximizes control and maneuverability for safe snow-clearing around obstacles:

- Thirty-two degrees of hydraulic angle in either direction improves handling for safe snow-clearing in congested areas.
- Mushroom skid shoes create more ground contact than other designs to prevent the front plow from digging into asphalt.
- Tighter turning radius with the wheel loader versus a motor grader makes plowing city streets safer.

Powerful Value. **Delivered.**

# WHEEL LOADER FRONT PLOW

## FEATURES

(2) 4" Bore x 18" Stroke Cylinders

Thick Internal Ribbing

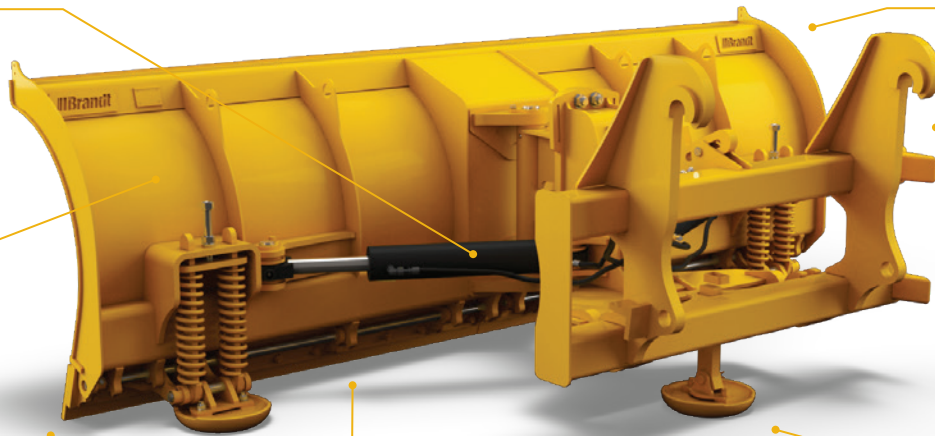

Thick External Ribbing on Back of Plow

Compatible with Quick Coupler

Spring Trip on Cutting Edge Only

Replaceable Cutting Edge

Mushroom Style Skid Shoes

### Oscillation Float

Enables the plow to follow the contours of the road for thorough snow-clearing.

### Flexible Design

Available in different sizes and lugging configurations for your unique needs.

### Compatible with Quick Coupler

Making attachment changes quick and easy.
