Brandt is excited to attend CONEXPO-CON/AGG 2023!

Who is Brandt?

We're a privately owned manufacturing and distribution company that serves a growing international audience in industries such as agriculture, construction, forestry, rail, mining, steel, transportation, material handling, and energy. We have more than 6000 employees and more than 180 locations in the USA, Canada, Australia, and New Zealand.

What makes us special?

Brandt has been shaking up the manufacturing industry year after year with quality, innovative equipment solutions. This could not be possible without the support of our customers. We actively seek feedback from the experts—you—and design our machines with your needs in mind. At CONEXPO CON/AGG, we invite you to see how your industry experience and direct input informs our process and results in the equipment you see on display.

What's in it for customers?

Tough, high-capacity manufactured products from Brandt are long lasting and heavy-duty and the perfect fit to help customers develop a more productive and profitable business.

We hope to see you at our booths throughout the tradeshow and at the following media events:

- **March 14, 3 pm, Booth S5304, Silver Lot**
—Product launch for the BMH40A material handler
- **March 15, 1 pm, Booth S63929, South Hall**
—Product launch for the HX120 hydrovac
- **March 17, 1 pm, Booth S63929, South Hall**
—Product launch for the lineup of new heavy haul trailers

Introduction

Powerful Value, Delivered is more than just words at Brandt.

It is our company-wide promise to help our customers succeed by empowering them with the outstanding performance of our people and the uncompromising quality of our products and services.

Grown from the seeds of an entrepreneurial spirit over 90 years ago, Brandt has a long history of providing powerful value to our customers through a solid commitment to strong core values; Quality, Innovation, Commitment and Customer Focus.

Originally, Brandt Electric designed and built innovative products including one of the first grain augers available in Canada.

Today, the Brandt Group of Companies is a growing, dynamic and diverse group of companies headquartered in Regina, Saskatchewan.

The Brandt Group is comprised of:

- ① **Brandt Equipment Solutions Ltd.** specializes in the design and manufacture of customized attachments and guarding for heavy-duty construction equipment, as well as machine conversions, heavy haul trailers and utility trailers.
- ② **Brandt Truck & Trailer** is Canada's largest Peterbilt Dealer Group with the largest parts inventory. Peterbilt has a global reputation for superior quality, industry leading design, innovative engineering and fuel-efficient solutions. Brandt delivers a full lineup of Peterbilt on-highway, vocational and medium duty products, including alternative fuel vehicles.
- ③ **Brandt Road Technology** delivers a broad range of the world's top equipment for the roadbuilding industry. Brandt is a dealer for John Deere construction equipment, Vögele pavers, Hamm compaction equipment, Wirtgen milling and concrete paving products, and Topcon positioning products.

④ **Brandt Mineral Technology** delivers the top-of-the-line Kleemann crushers and screening equipment, John Deere construction equipment, and Topcon and Sokkia positioning technologies. Whether you need to meet the high standards for concrete and asphalt aggregates reliably or are looking for a bucket that can take on your toughest challenge, Brandt has all your aggregate equipment needs covered.

⑤ **Brandt Agriculture** is a distributor of John Deere farm equipment. We also deliver our own full line of hard-working grain augers, belt conveyors, grain carts, grain vacs, grain bagging and unloading equipment, as well as heavy harrows, land rollers, and ag blades. Brandt-built agricultural products are available at over 800 locations in the USA, Canada, Australia, and New Zealand.

⑥ **Brandt Material Handling** has the most impressive lineup of premium forklifts, pallet jacks, telehandlers, and other material handling equipment in the industry.

Brandt also delivers inspections, service and parts solutions, planned maintenance for equipment and docks, warranties for used equipment, operator safety training (including train the trainer), equipment and attachment rental, storage solutions, and unparalleled customer service support.

⑦ **Brandt Tractor Ltd.**, is the largest privately held John Deere construction and forestry dealership in the world. Brandt Tractor is the exclusive dealer for:

- John Deere construction and forestry equipment - from backhoes, excavators and graders, to skid steers and wheel loaders - along with Hitachi's lineup of rugged forestry swing machines.
- Brandt Truck Rigging & Trailers is your #1 source for specialized transportation equipment for the oil & gas, mining, pipeline, construction/infrastructure and environmental industries. Work Ready™ Brandt trailers are available for every application, providing a dependable transport solution, no matter what you're hauling, and ready to work every single day.

- American Augers, Trenchor and Ditch Witch – a comprehensive offering of underground construction equipment for all HDD/trenching applications.
- The Wirtgen Group, Road and Mineral Technology, including Vögele paving equipment, Hamm compaction equipment, Kleemann aggregate crushing and screening equipment, and Wirtgen milling and concrete paving products.
- Topcon Positioning Systems end-to-end solutions for the survey, engineering, mapping, construction, BIM and mining sectors.

⑨ **Brandt Developments Ltd.** is a community-oriented real estate developer with the financial resources and proven expertise in the design, build, and management of highly-efficient, environmentally considerate and technologically advanced commercial business sites.

⑩ **Brandt Engineered Products Ltd.** (ISO 9001-2008) specializes in innovative machine and system design, manufacturing, installation, and commissioning for the tube and pipe and mining industries around the world.

⑪ **Brandt Finance Ltd.** provides financing for new and used equipment, including non-Brandt products.

⑫ **Brandt Positioning Technology** is a Topcon and Sokkia dealer for construction, survey/engineering/GIS, and agriculture positioning technologies.

⑬ **Brandt Road Rail** manufactures and markets railway maintenance equipment to customers throughout the world.

Brandt has over 180 locations in the USA, Canada, Australia, and New Zealand, over 6000 employees and a growing international audience; serving the construction, agriculture, forestry, rail, mining, transportation, and tube & pipe industries with unique custom products.

Brandt is one of Canada's largest privately-owned companies and is among an elite group of Platinum Members of Canada's 50 Best-Managed Companies.

Collaborative Product Design

Product development at Brandt starts with the experts: you.

We design all our products in partnership with equipment owners, operators, and dealers. We meet with our User Engagement Groups three times throughout the process.

Early on, we take the time to understand where your existing machines are holding you back, and what changes could be made to help you be more productive. Then we develop and present an initial product concept, and you help us perfect it. And finally, we bring you in to evaluate the prototype in person, giving you one final opportunity for feedback. In other words, you express your thoughts on the ideal machine, we listen, then we deliver.

Through our Collaborative Product Design process, Brandt consults extensively with contractors to create innovative equipment that sets the standard for the industry. It's what makes us unique. And it results in more efficient, productive machines that get the job done and meet your specific needs.

Equipment Solutions

The right attachment can turn a good piece of equipment into a great one.

We understand there is no room in your world for attachments that break down when the going gets tough. That's why Brandt designs and manufactures products that are Hard To The Core—the toughest, most innovative and hard-working lineup of attachment, guarding, and task-specific whole goods solutions on earth.

Whatever your need, the Brandt Equipment Solutions team has already built the right attachment for your **excavator, wheel loader, dozer, motor grader, backhoe loader or skid steer**. Our selection of more than 3000 products ensures you can easily find the rock-solid equipment you need to dominate the jobsite or we'll work with you to create a custom solution that will deliver powerful value for your business and keep you a step ahead of the competition.

Industrial Attachments: Wheel Loaders

Brandt wheel loader attachments are built exclusively for John Deere wheel loaders.

No longer used for just bucket work, wheel loaders are often a multi-purpose work tool on the job site. Brandt recognizes this and is constantly striving to come up with innovative ways to increase the efficiency of your equipment.

Our wheel loader attachments have been designed for work in the harsh

conditions of the Western Canadian oil patch. Brandt attachments have developed a reputation to meet these extremely demanding expectations and deliver the uncompromising safety standards these sites require. If they're tough enough for the oil patch, they'll take whatever your workday can throw at them.

Industrial Attachments: Excavators

Brandt excavator attachments are built exclusively for John Deere excavators.

With excavators being used for far more than just excavation on many job sites, Brandt takes pride in offering new and innovative designs for this ever-evolving market.

By drawing on customer input to drive the development process, our design team breaks new ground while continually

improving current designs to optimize operator convenience and efficiency. Safety is a top priority, so each attachment is designed to provide exceptional operator and machine protection.

Material Handler

BMH40A MATERIAL HANDLER

Built Right. Here.

The BMH40A from Brandt is designed and manufactured in North America and purpose built for the scrap material handling industry. This world-class heavy-lifter delivers unmatched productivity with 24/7/365 support plus easy-to-find components for increased uptime.

Improved Productivity

With proven Deere components and rapid cycle times, the BMH40A allows you to do more in less time.

- Final Tier 4 PowerTech PVS 6.8L engine delivers net rated power of 223 hp at 1900 rpm.
- Market-leading swing torque and speed maximizes cycle times.
- Electric-over-hydraulic (EH) system provides ideal flow for maximum efficiency and productivity.

Increased Uptime

Second-to-none service and support paired with easy-to-maintain components means more uptime from your machine.

- Automatic reversing, cool-on-demand fan intervals keep the radiators free of debris.
- Excellent operator access and egress and localized ground access simplify daily maintenance.
- Extensive dealer network, factory-trained technicians, and 24/7/365 support minimize downtime.

Lower Cost of Operation

The energy recovery system and auto-idle/shutdown maximize fuel efficiency. They also contribute to reduced cost of operation and wear of machine components.

- Nitrogen-filled cylinder and reservoir counteracts boom and arm weight to reduce fuel consumption.
- Power modes adjust engine settings, allowing a focus on fuel economy, productivity, or both.
- Auto-idle and auto-shutdown save fuel when the machine is inactive.

Hi-Rail Loader

| HRL170 HI-RAIL LOADER

Gear Up for Productivity.

Shift your output into high gear with the all-new Hi-Rail Loader from Brandt. This innovative machine combines the efficiency of a Deere 544P and 624P with the flexibility of hydraulically-controlled Hi-Rail gear.

Versatility

The Hi-Rail Loader is your go-to multi-purpose loader on and off the tracks:

- Optional railcar coupler and train air allows this unit to safely pull railcars and tackle a wider range of jobs.
- Deere Hi-Vis Coupler enables compatibility with a variety of attachments, easily adapting to the task at hand.
- Hydraulically-controlled Hi-Rail gear can be retracted to take on jobs off the tracks as a regular wheel loader.

Productivity

The Hi-Rail Loader delivers superior efficiency, wherever your operation needs it:

- On-rail capabilities allow the Hi-Rail Loader to easily and effectively clear snow off tracks.
- Near-parallel lift reduces load rollback, minimizing spillage and requiring fewer manual adjustments.
- Easy-to-use controls integrate seamlessly with the Deere control panel, making operation simple.

Reliability

This robust machine is a dependable asset that you can count on each and every day:

- Optimized routing for wire harnesses and hydraulic hoses reduces contact interference and the associated premature wear and leakage.
- Unique Hi-Rail gear suspension provides greater stability to better handle variations in track geometry to improve operator safety.
- Coast-to-coast 56-branch support network ensures parts and service are readily available, anywhere in Canada.

Pipelayer

BPL100L & BPL100K PIPELAYER

Pipeline Powerhouses.

The BPL100L is built from the ground up to deliver productivity without compromise. This purpose-built pipelayer is your go-to solution, whether you're lowering in mid-diameter pipe or supporting larger machines on large-diameter pipe projects.

Brandt pipelayers are the toughest, safest, most stable pipelayers on earth. No matter the size of the job, we have a machine to deliver unmatched productivity, safety, and efficiency. Our models range from 41,600 to 220,000 lbs max load capacity. The BPL100L represents our mid-sized line.

Productivity

The BPL100L delivers operational efficiency you can count on to accomplish more:

- ECO mode automatically adjusts engine power settings based on load, optimizing fuel economy.
- Symmetrical winch-mount locations provide clear visibility and equal weight distribution with a low center of gravity for increased stability and easier positioning.
- Smaller machine allows for superior maneuverability, so this pipelayer is easier to use on congested jobsites.

Safety

This machine gives you real-time stability feedback for the ultimate in jobsite safety:

- SmartLift™ Dynamic Stability Monitoring System delivers a continuous stream of real-time terrain and machine data, allowing the operator to monitor lift capacity in all conditions.

- Camera and radar packages are available with up to four cameras and three radar units to keep the operator aware of their surroundings.
- Brandt Smartlift™ automated warning system gives visible and audible machine-tipping warnings, adjustable anti-two-block warnings, and low-rope warnings.

Versatility

This pipelayer enables you to take on a wider range of tasks with just one machine:

Flexible design allows the BPL100L to be configured for specialized roles as a support tractor for larger machines.

- End-prep configuration adds additional decking to carry air compressors and generators to quickly bevel pipe ends for welding.
- Weld-shack configuration allows a shack to be attached to the load hook to create a controlled environment and guarantee successful welds.

Rough Terrain Forklift

RTF160P & RTF200P

Challenging Terrain? Challenge it Back.

Move heavy loads with confidence, no matter where they need to go. The Rough Terrain Forklift (RTF) Series from Brandt is the strongest, safest machine in the yard.

More Productive

These efficient units combine stability, maneuverability, and strength to finish the big jobs faster:

- Delivers up to 20,000 lb of payload, allowing you to move more material, faster.
- Wheel loader articulation offers superior maneuverability in tight situations or jobs requiring precision.
- All-wheel drive and outstanding ground clearance improve drivability and job performance even in the most challenging yard types.

Reliability

The RTF Series delivers the power and comfort of a wheel loader and the peace-of-mind of a certified forklift:

- Co-engineered with John Deere and based on Deere's proven wheel loader platform.
- Solid-steel I-beam mast construction allows for years of heavy use without any worry of premature failure.

- Tines and mast ride on a wide-stance loader for unmatched lateral stability when handling robust loads and working on rough terrain.

Safety

This rigorously-tested design is fully-certified to ANSI B56.6 standards, giving you demonstrably safer equipment:

- Superior stability, proven on a 5.7° longitudinal slope and a 21.8° lateral slope, maximizes safety on uneven terrain.
- High-durability forks deliver a minimum-yield strength of 825 MPa, allowing them to safely handle the heaviest loads.
- Rock-solid cab utilizes an integrated ANSI 56.6-certified ROPS structure to ensure superior operator protection.

Heavy Haul Trailers

**WORK
READY**

Work Ready™ Brandt Heavy Haul Trailers feature a full range of open-deck models with mechanical, hydraulic, or fixed goosenecks, multiple lengths/widths and capacities, jeeps and boosters, and other custom configurations.

This premium trailer lineup is available to customers through a growing network of company-owned and independent dealerships across North America.

On display at CONEXPO-CON/AGG 2023 at the Brandt booth S-63929 in South Hall are the C550 55-ton construction trailer and the H850 85-ton square-tail trailer.

Through our collaborative product design process, Brandt has consulted extensively with customers to create heavy haul trailers that set the standard for the industry, providing versatility and reliability in a premium product offering.

Utility Trailers

**WORK
READY**

Brandt utility trailers* are the most dependable transport solution, no matter what you're hauling.

Work Ready™ Brandt utility trailers are purpose-built with durable components and the toughest powder-coat paint finish in the industry to maximize service life and reduce the total cost of ownership.

These trailers are designed for fast, effortless loading so you can start working sooner, with:

- Bolt-on key components are easily replaceable for fast maintenance, making this a fully serviceable design for maximum uptime.
- Torsion suspension delivers maximum reliability, while reducing maintenance.
- Equalized leaf spring suspension provides enhanced durability when taking heavy loads over debris, curbs, or rough terrain.

Our utility trailers are designed with key features to maximize operator protection:

- Forward self-adjusting brakes keep the brakes at their peak performance for longer while eliminating the need for manual adjustments.
- Galvanized upgrade available for superior rust protection and enhanced structural durability over time.

Safety

Brandt recognizes the right to work in a healthy and safe work environment and is committed to providing a healthy and safe work environment for all its employees.

All members of Brandt's workplace – including owners, executive, managers, supervisors, employees, and all others – have personal and direct responsibility and accountability for workplace health and safety.

Brandt believes that in order for its health and safety program to succeed, active participation from everyone within the company is a must. Our program sets applicable legislation as its minimum standard. It is not one which is added onto existing programs; rather it is integrated into all aspects of work at Brandt.

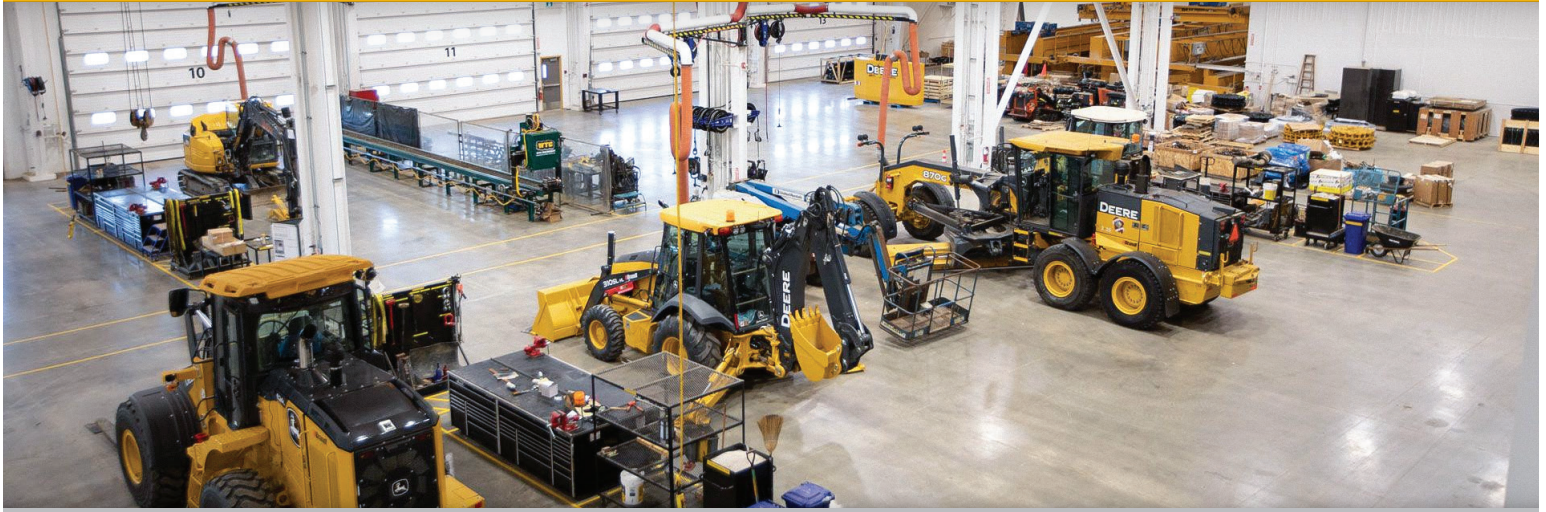

Brandt actively works with its employees to promote a healthy and safe work environment. This includes open and effective two-way communication, consultation and cooperation between management and employees, and between all departments and locations.

Brandt provides the time, people and resources required to achieve our goal of eliminating loss in our workplace. Brandt also provides ongoing training to all of its employees to ensure they are competent to perform their jobs safely and effectively.

Brandt continuously improves its health and safety programs through ongoing inspections, audits, and investigations. As well, all policies and procedures are reviewed annually to ensure they are current and effective.

There is a high hazard risk in many of our day-to-day jobs. It is our firm belief that the level of success which can be achieved by Brandt is directly proportional to the emphasis placed upon preservation of our most valuable assets: our employees.

Dealer Support

When you sign up
to carry our products,
Brandt has your back.

We offer our dealers:

- Retail and financing programs with interest-free terms for new dealers and pricing support to assist in market launches
- Strategically located territory managers throughout the US for optimal support
- 24/7/365 support for dealer and customer technical support, available at our 1-800 phone number
- Dealer portals for whole goods ordering, parts, service, and warranty support
- Replacement parts for dealer and customer needs stocked at 2 locations: Bloomington, IL, USA, and Regina, SK, Canada
- Co-op advertising program for heavy haul trailers and Brandt agricultural products
- Social media and advertising support to tailor messages for your market
- Customized e-communications with dealer logo for distribution to your customers.
