

Brandt FleetWise™

Machine Monitoring & Maintenance System

KNOW YOUR FLEET.

They say you can't manage what you can't measure, but measuring the efficiency of your fleet has always been the hard part. Now, Brandt FleetWise™ gives you continuous control with all-in-one machine monitoring for your whole fleet – ALL MAKES – and allows you to focus on making money rather than scheduling oil changes, tracking trouble codes and wondering what your equipment is up to.

FleetWise™ delivers:

1 Increased uptime

- Track machine data to identify and fix issues before equipment failure.
- Ensure that all maintenance is scheduled and completed on time.
- Additional repairs can be conducted while machine is in for scheduled service.
- Direct line from certified experts to JDLink-equipped machines for quick troubleshooting.

2 Lower daily operating costs

- Accurately track idle time and fuel burn for each machine and manage usage.
- Monitor engine load and fuel consumption to match the right machine to the job.
- Make recommendations for machine servicing, based on your work schedule.
- Access schedules for component/machine replacement, based on your goals.

Brandt

FleetWise™ delivers comprehensive machine management solutions for your entire fleet via specialized hardware, software and equipment monitoring services.

1 Hardware

OEM or aftermarket data terminal that wirelessly transmits relevant operational data.

- Deere Equipment (3G/4G terminals)
- OEM Terminals
- Fleet Vehicle Devices
- Other (light stands, compressors, trailers, etc.)

2 Software

Telematics provider software package (JDLINK™ or other) that tracks and reports relevant operational data.

- Deere (JD Link™ Ultimate) – All possible data
- Other (non-Deere) – Up to 19 data points including serial number, asset ID, hours, location, GPS distance travelled, machine odometer, and more.

3 Monitoring (FleetWise™)

Certified equipment specialists at Brandt's Machine Monitoring Center will track your machine data and proactively interact with you to inform, plan, execute and document all service events.
