

## Positioning Technology

# New Brandt Positioning Technology Facility Promises to Make Tech Integration Easier than Ever.

The Brandt Group of Companies is pleased to announce that the all-new Brandt Positioning Technology Centre of Excellence will be opening on April 26th at 2 Castlevue Drive, Brampton, Ontario. This facility is the only one of its kind in Canada and represents the result of Brandt's years of continued investment in the Canadian survey, engineering and construction industries.

The new facility will offer the largest parts and equipment inventory in Canada, as well as provide services, products and support for all Brandt's geospatial and construction technology offerings – which currently includes the full suite of Topcon and Sokkia products. The Centre of Excellence will also feature in-house product demonstrations, training, and an expert support team.

*// We're really excited about all that this new facility has to offer and all of the new ways it's going to allow us to serve our customers in the GTA and beyond. The goal is always to set our customers up for success and to help make sure they get the most out of their equipment. The Centre of Excellence goes a long way to help us achieve that. //*

– DAN HENDRIKS VP OF BRANDT POSITIONING TECHNOLOGY

In combination with Brandt's pre-existing positioning technology footprint, the Brandt Positioning Technology Centre of Excellence promises to provide a distinct advantage over the competition with a winning combination of parts, equipment, service and support for its customers.
