

WE VAC IT UP.

Brandt Hydrovacs deliver maneuverability, capacity, and precision, backed by industry-leading support.

ON-SITE AGILITY

Their compact design and industry-leading boom reach allow for quicker completion of tasks without frequent repositioning. And, with the lowest overall height in their class, they enable better clearance to power lines and other obstacles.

LARGER LEGAL LOADS

With a lightweight design and large tank capacity, Brandt Hydrovacs deliver maximum road-legal loads every single time.

EASY TO OPERATE

With accessible control systems and a quick start feature for quicker work at the push of a button, **our truck is ready to work before you can get your boots on.** Plus, you can dig up to 8' deep with only one dig tube.

BETTER FUEL EFFICIENCY

The industry-leading vacuum system delivers superior performance at lower RPMs, reducing noise and saving fuel by at least 25% when compared to similar classes.

TOP-QUALITY COMPONENTS

The abrasion-resistant, steel-constructed boom turret, hydraulically driven design, and marine-grade electrical controls deliver long-lasting, dependable performance. Plus, all parts are North American built, including a Peterbilt chassis and Bosch hydraulic pump.

BEST-IN-CLASS WARRANTY

Keep on digging deep with a best-in-class, 1-year warranty on the entire vac system.

Hydrovac Lineup

HX085 HYDROVAC

The HX085 is made for maneuverability. With its compact size and the lowest tare weight in its class, it'll navigate tight city streets and residential areas with ease while taking the guesswork out of weight restrictions

HX120 HYDROVAC

The HX120 delivers unmatched productivity and precision on industrial sites, with the longest boom reach in the industry, an accurate load management system, and a high-power blower.

HX120 SPIF HYDROVAC

The HX120 Spif Hydrovac delivers all the same features as the HX120, but also comes with a self-steering lift axle to meet Ontario transportation regulations.
